Welcome

Welcome to the latest edition of the Tardigrad Newsletter! We're delighted to share the highlights of 2025 so far — from global exhibitions to new partnerships and innovative solutions for temperature-controlled logistics.

Tardigrad at Arab Health 2025 Innovation, Networking & Growth

From January 27–30, Tardigrad proudly participated in **Arab Health 2025** at the Dubai World Trade Centre — one of the world's largest healthcare exhibitions.

As part of the Czech pavilion, we presented our portfolio of **temperature-controlled solutions** including Peli BioThermal packaging, Sensitech dataloggers, Wilpak thermal protection, and Bio Bottle systems.

Arab Health was not only about showcasing — it was about connections. Over four days, our team engaged in meaningful discussions, reconnected with partners, and explored new collaborations to drive safe and efficient cold-chain logistics worldwide.

We thank everyone who visited us and look forward to Arab Health 2026!

See You at CPHI 2025 in Frankfurt

Event > CPHI 2025
Event date > 28–30 October 2025
Location > Messe Frankfurt, Germany

Mark your calendars! CPHI Europe 2025 will take place in Frankfurt from 28–30 October.

As the world's largest pharma event, CPHI brings together over 60,000 professionals from 160+ countries.

Tardigrad will be there — join us to discuss tailored solutions for pharma logistics and explore how we can support your business needs. Contact us to arrange a meeting in advance.

And don't miss our Tardigrad Tombola (Lucky Draw) — back by popular demand, bringing a bit of fun and surprise to your CPHI experience!

To book a meeting with our team e-mail to > mjirovcova@tardigrad.com

Featured Key Study

One box in, two boxes out

When logistics gets tricky, we keep the cold chain moving.

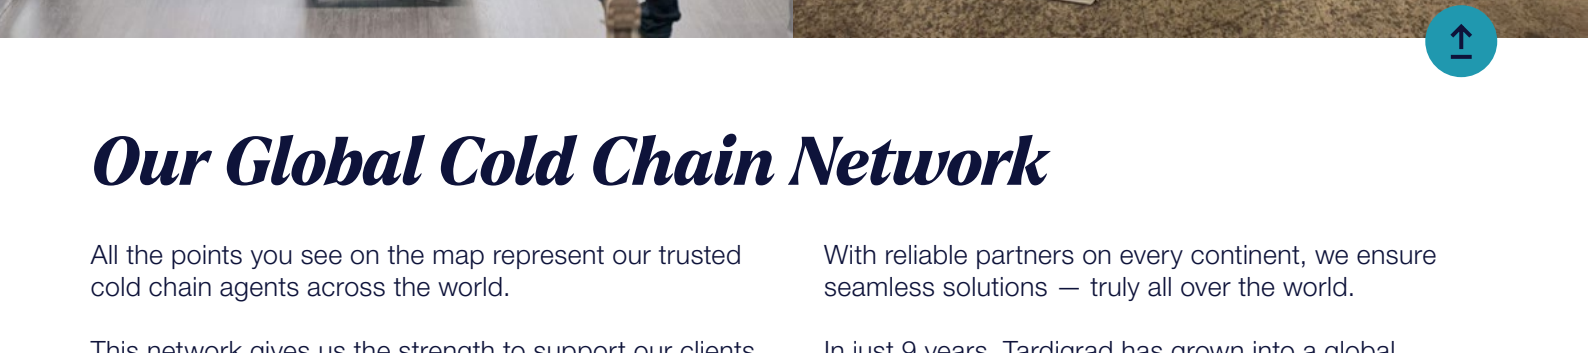

Route
Třemošnice -> Prague -> Istanbul -> Tbilisi
(Turkish Airlines)

The Package
Temp > +2 °C to +8 °C

1x CoolGuard™ Advance 12 L
repacked into 2x Credo Cube 12 L

The Challenge
Upon arrival in Tbilisi, customs clearance was blocked: one shipment could not be declared for two different consignees.

- Action**
- Shipment remained in temperature-controlled storage at TBS (with logger inside).
 - Returned to Prague under strict cold chain conditions.
 - Under customs supervision, medicines were separated into two new Credo Cube 12 L boxes.
 - Fresh dataloggers installed, with a protocol issued to ensure full traceability.
 - Both boxes were cooled, booked on separate AWBs, and re-exported via Istanbul.
- Outcome**
Cold chain integrity preserved end-to-end. Both shipments were successfully cleared and delivered in Tbilisi on 31 July.
- Key takeaway**
Even when plans change, we keep the shipment safe, compliant, and on time – no shortcuts, no compromises.

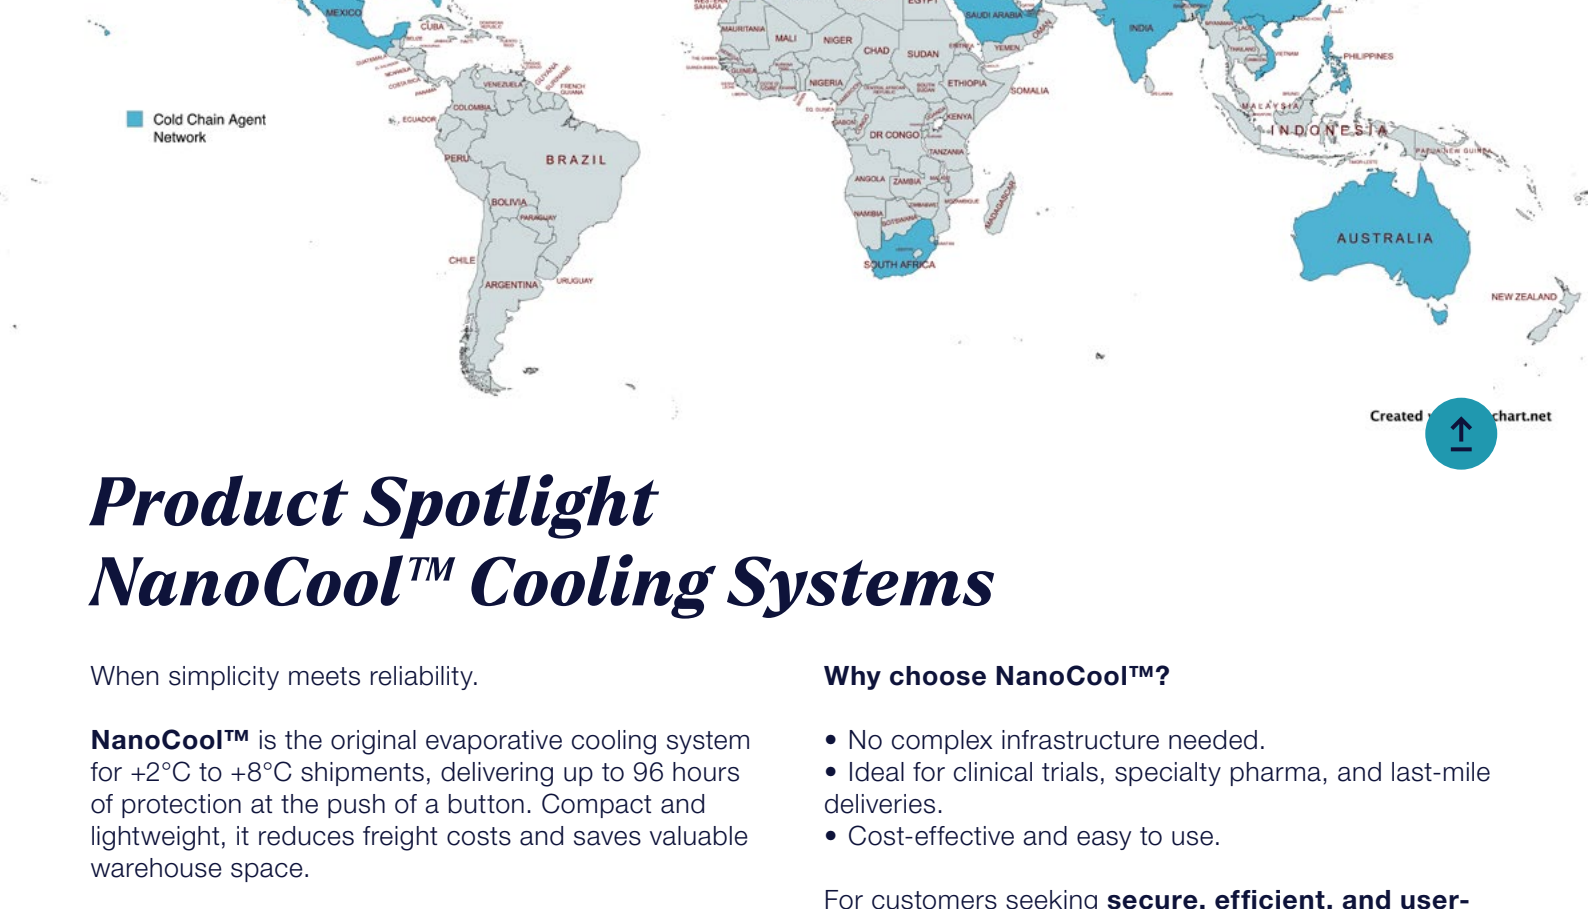

Our Global Cold Chain Network

All the points you see on the map represent our trusted cold chain agents across the world.

This network gives us the strength to support our clients anywhere and the flexibility to take part in complex international projects.

With reliable partners on every continent, we ensure seamless solutions — truly all over the world.

In just 9 years, Tardigrad has grown into a global network — and as we approach our 10th anniversary, we continue to expand with the same focus on quality, safety, and reliability.

Product Spotlight NanoCool™ Cooling Systems

When simplicity meets reliability.

NanoCool™ is the original evaporative cooling system for +2°C to +8°C shipments, delivering up to 96 hours of protection at the push of a button. Compact and lightweight, it reduces freight costs and saves valuable warehouse space.

Why choose NanoCool™?

- No complex infrastructure needed.
- Ideal for clinical trials, specialty pharma, and last-mile deliveries.
- Cost-effective and easy to use.

For customers seeking **secure, efficient, and user-friendly cold-chain packaging**, NanoCool™ is a proven solution.

NEW PRODUCT SPOTLIGHT Peli BioThermal Véro One

Peli BioThermal has launched Véro One - a new generation of recyclable dry ice packaging designed to simplify deep-frozen logistics while reducing environmental impact.

This single-use, curbside recyclable shipper offers pharmaceutical and biotech companies a flexible and sustainable option for transporting temperature-sensitive products where reusable systems may not be feasible.

Lightweight and return-free, Véro One helps reduce freight costs and eliminate reverse logistics, while maintaining strict dry ice performance for up to 96 hours.

Peli BioThermal continues to innovate for the innovators - delivering performance, simplicity, and sustainability in one smart solution.

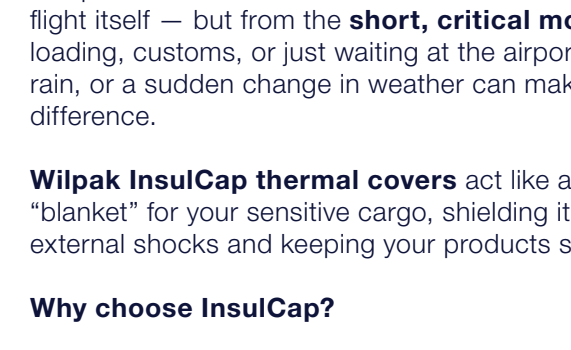

Membership: Life Sciences 4.0

We are excited to announce that **Tardigrad has become a member of Life Sciences 4.0** — a professional platform connecting companies, universities, startups, and research institutions across pharma, medtech, cosmetics, and nutrition.

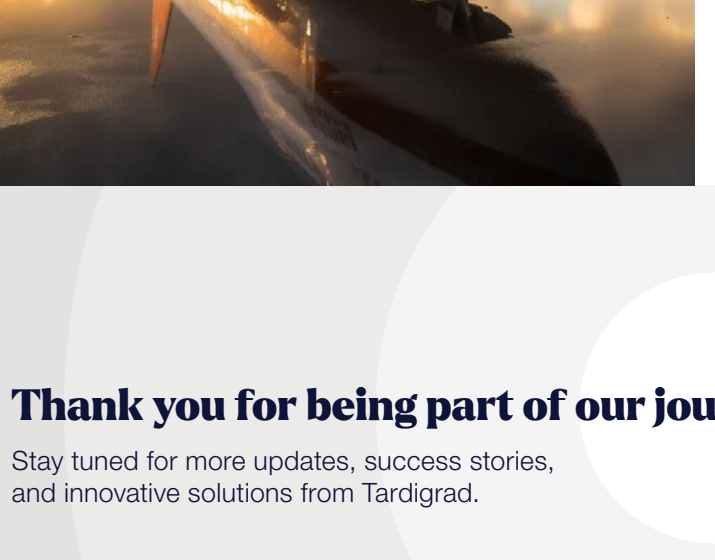

This membership allows us to:

- Engage in collaborative research and innovation.
- Join workshops, networking events, and industry projects.
- Stay ahead of regulatory, digital, and sustainability trends shaping healthcare and pharma.

Being part of Life Sciences 4.0 reinforces our mission to **connect science and logistics** and support the growth of the healthcare ecosystem.

Wilpak Thermal Covers Smart Protection for Your Shipments

Temperature risks often don't come from the long flight itself — but from the **short, critical moments**: loading, customs, or just waiting at the airport. Sun, rain, or a sudden change in weather can make all the difference.

Wilpak InsulCap thermal covers act like a protective "blanket" for your sensitive cargo, shielding it from external shocks and keeping your products safe.

Why choose InsulCap?

- **Peace of mind** during handovers: airport handling, customs clearance, last-mile delivery.
- **Eco-friendly**: reusable and recyclable — protecting both your cargo and the planet.
- **Cost-smart**: lightweight, easy to apply, and helps to save costs.

In cold chain logistics, sometimes **the smallest layer makes the biggest difference**. With Wilpak covers, you get an **extra shield of confidence** for every shipment.

Ask us how Wilpak solutions can safeguard your shipments.

Thank you for being part of our journey • ————— • **Tardigrad Team**

Stay tuned for more updates, success stories, and innovative solutions from Tardigrad.
