DRY ICE SHIPPER

WHAT ARE DRY ICE SHIPPERS?

We offer one of the most comprehensive ranges of dry ice shipping systems, which are an affordable, readily available method for protecting your frozen product. These shippers are engineered and tested to work in real world situations, enabling you to ship immediately with confidence.

Our shippers have been subjected to constant stress tests in ambient temperatures of +30°C and ensure temperature sensitive materials are kept frozen, making them suitable for a wide range of applications and environments.

Why choose our Dry Ice Shippers?

- Expanded Polystyrene (EPS) insulation material used; moulded with density to achieve the performance standards required.
- Qualification reports available providing complete documentation for audit purposes.
- Fully printable cartons, enabling customers to offer brand specific systems.
- Constant stress test qualification. Shippers tested to a constant ambient of +30°C, to ensure quality and efficacy of the payload is maintained during demanding global chain shipping lanes.
- These off the shelf dry ice systems are available from 5 litres to 106L, providing the users with a multitude of pre-qualified, robust solutions.

“Our range of EPS containers has been designed to maximise thermal efficiency, whilst remaining cost effective.”

DRY ICE SHIPPER

DURATION

Up to 96 Hours

TEMPERATURE

Below -20°C

VOLUME

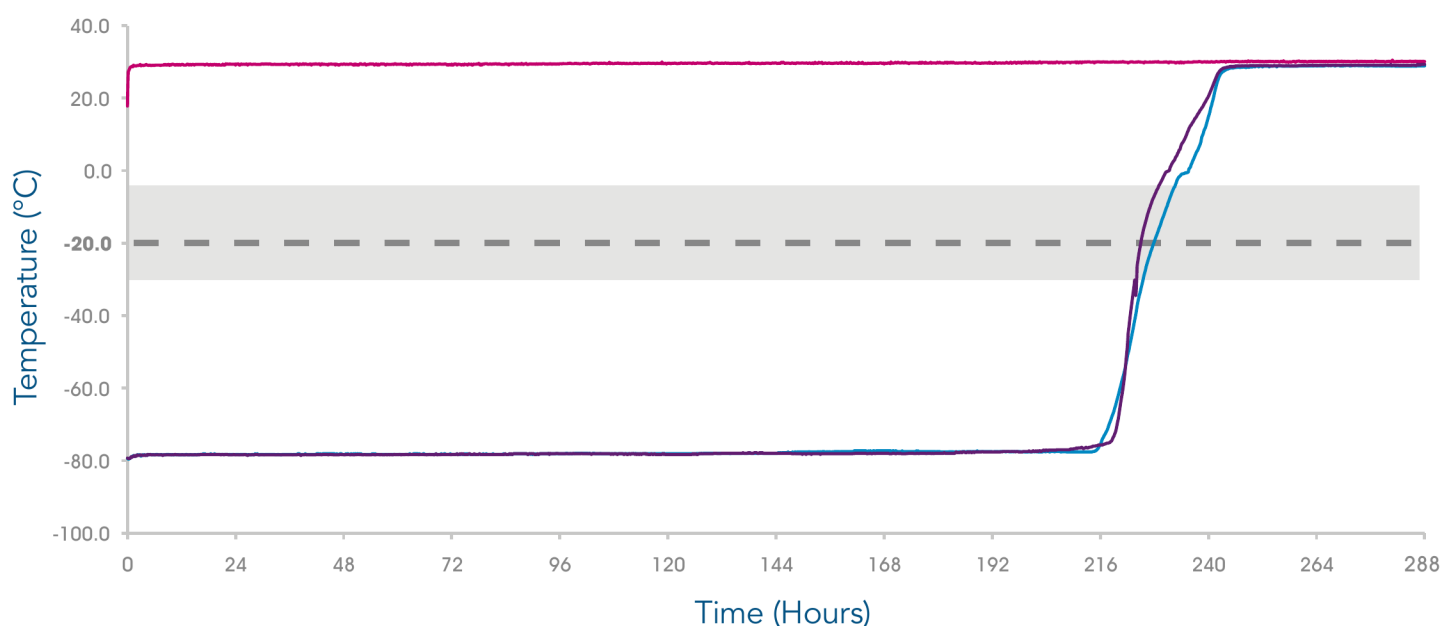

Up to 106L

PRODUCT SPECIFICATIONS

Code	Exterior Dimensions - mm	Interior Dimensions - mm	Internal Volume - lts	Dry Ice Loss Rate - g/hrs	Maximum Duration - hrs

"Our unrivalled 'Real World' data profiles and technical services provide you with the assurance that your product will arrive at its destination as you intend it to."

DRY ICE SHIPPER TESTED AT A CONSTANT OF +30°C

This test confirms the product maintains temperature range below -20°C for over 216 hours with an external constant temperature of +30°C.
